Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on the quality and completeness of the dataset.	Use a larger and cleaner dataset for future improvements.
2	The application is designed for local deployment and has limited scalability.	Deploy on a cloud platform such as Render or AWS for better scalability.
3	The current model uses Linear Regression, which may not capture complex relationships.	Upgrade to advanced machine learning models such as Random Forest, XGBoost, or Neural Networks in future versions.
