

Solution Architecture

Date	15 March 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Solution Architecture Diagram:

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides the user interface for registration, data input, prediction results, graphs, and recommendations.	HTML5, CSS3, Bootstrap 5, JavaScript
API Gateway	Receives HTTP requests from the client, routes them to the appropriate backend functions, and returns prediction results.	Flask
Microservices (Core Logic Service)	Performs user authentication, data preprocessing, feature selection, Linear Regression prediction, and result generation.	Python, Pandas, NumPy, Scikit-learn, Joblib
[Database]	Stores the dataset, user information, trained machine learning model, and prediction history.	CSV Dataset, SQLite
