

Demonstration of Proposed Features

Date	15 March 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	1 Mark

Demonstration of Proposed Features:

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrate d (Yes / No)	Remarks
1	User Authentication	Allows users to register and securely log in to the application before accessing prediction features.	Implemented	Yes	Working successfully.
2	Health & Lifestyle Data Collection	Collects user information such as health indicators and lifestyle details through a web form.	Implemented	Yes	Input validation performed successfully.
3	Well-Being Prediction	Uses the trained Linear Regression model to predict the user's overall well-being score.	Implemented	Yes	Accurate predictions generated from user input.
4	Dashboard & Data Visualization	Displays prediction results using graphs, charts, and summary statistics for better understanding.	Implemented	Yes	Graphs displayed correctly on the dashboard.
5	Personalized Recommendations	Provides suggestions to improve well-being based on the predicted score and input data.	Implemented	Yes	Recommendations generated dynamically.
6	Flask Web Application Integration	Integrates the frontend, backend, dataset, and machine learning model into a complete web application.	Implemented	Yes	End-to-end workflow tested successfully.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
